ILORIN INNOVATION HUB · ORBIT

Your ORBIT handbook

How to take on your weekly tasks, hand in work that can be marked, keep your logbook, and get help — everything you do on ORBIT, screen by screen.

For Interns **Platform** orbit2.iih.ng **Cohort** ORBIT 2.0

This handbook is for interns on every ORBIT programme — SIWES, internship, NYSC and volunteer. The parts that only apply to some of you, like the logbook, say so. It is written to be looked up rather than read through, so each section stands on its own; start with Section 01 if you are new.

SECTION 01

Getting started

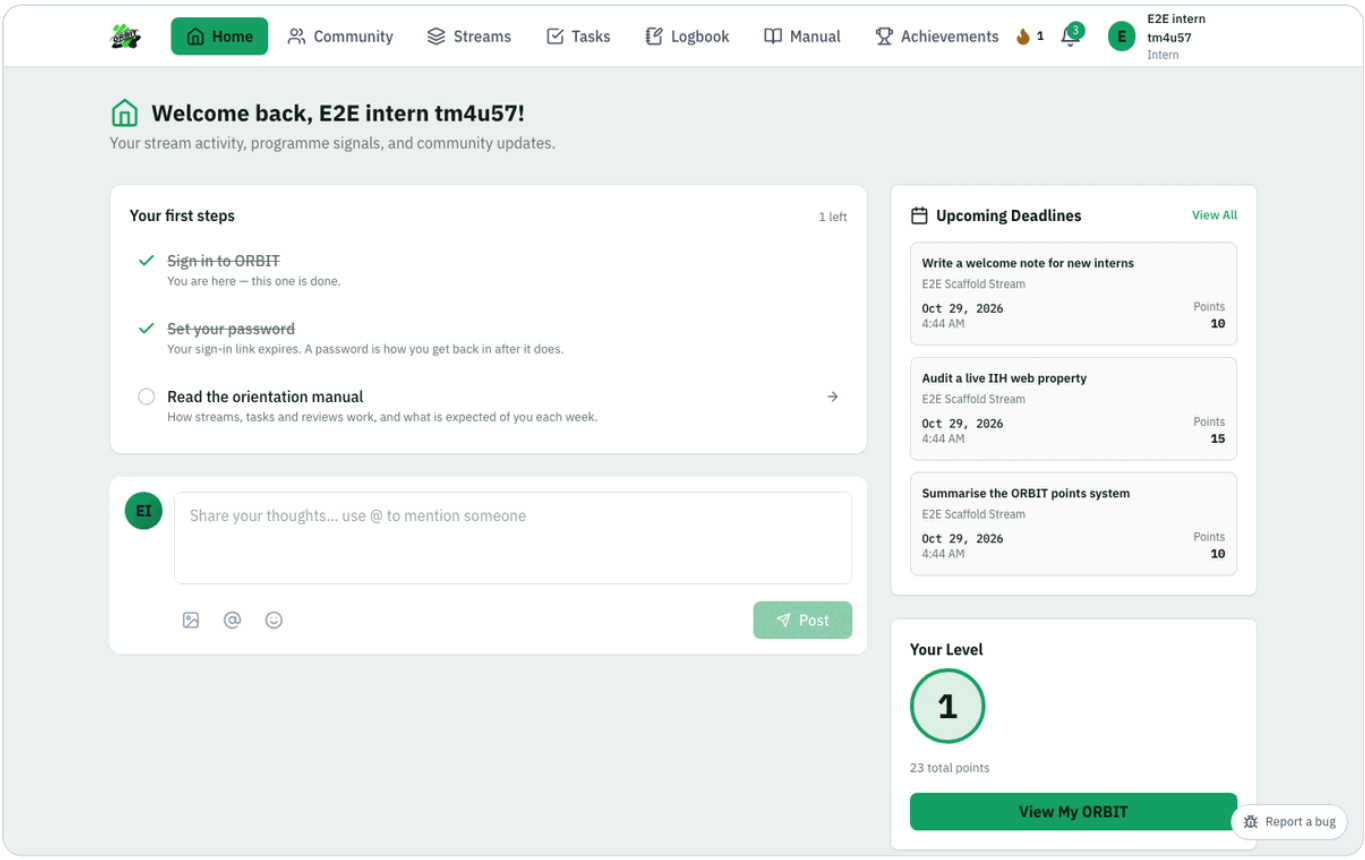

ORBIT is where your placement happens: your weekly tasks, your submissions and marks, your logbook if you keep one, and your stream's conversations. Everything is at `orbit2.iih.ng`, on a phone or a computer.

Signing in

1. Open `orbit2.iih.ng`.
2. Sign in with your email and password — or choose **Send me a magic link instead** and open the link emailed to you. New members have no password yet, so the magic link is how you get in the first time.
3. Set a password from **Settings** once you are in, so you do not need a new link every time.

> Nobody from ORBIT will ever ask you for your password — not the ORBIT Agent, not staff, not by email.

Your home page

Home. Your stream's posts and announcements, and — while you are new — a short **Your first steps** checklist that disappears once it is done.

The menu across the top takes you to **Community**, **Streams**, **Tasks**, **Logbook**, **Manual** (how the programme works, with this handbook to read or download) and **Achievements** (the leaderboard and your badges). The bell is your notifications; your picture, top right, opens a menu with your profile, **My Messages** and settings.

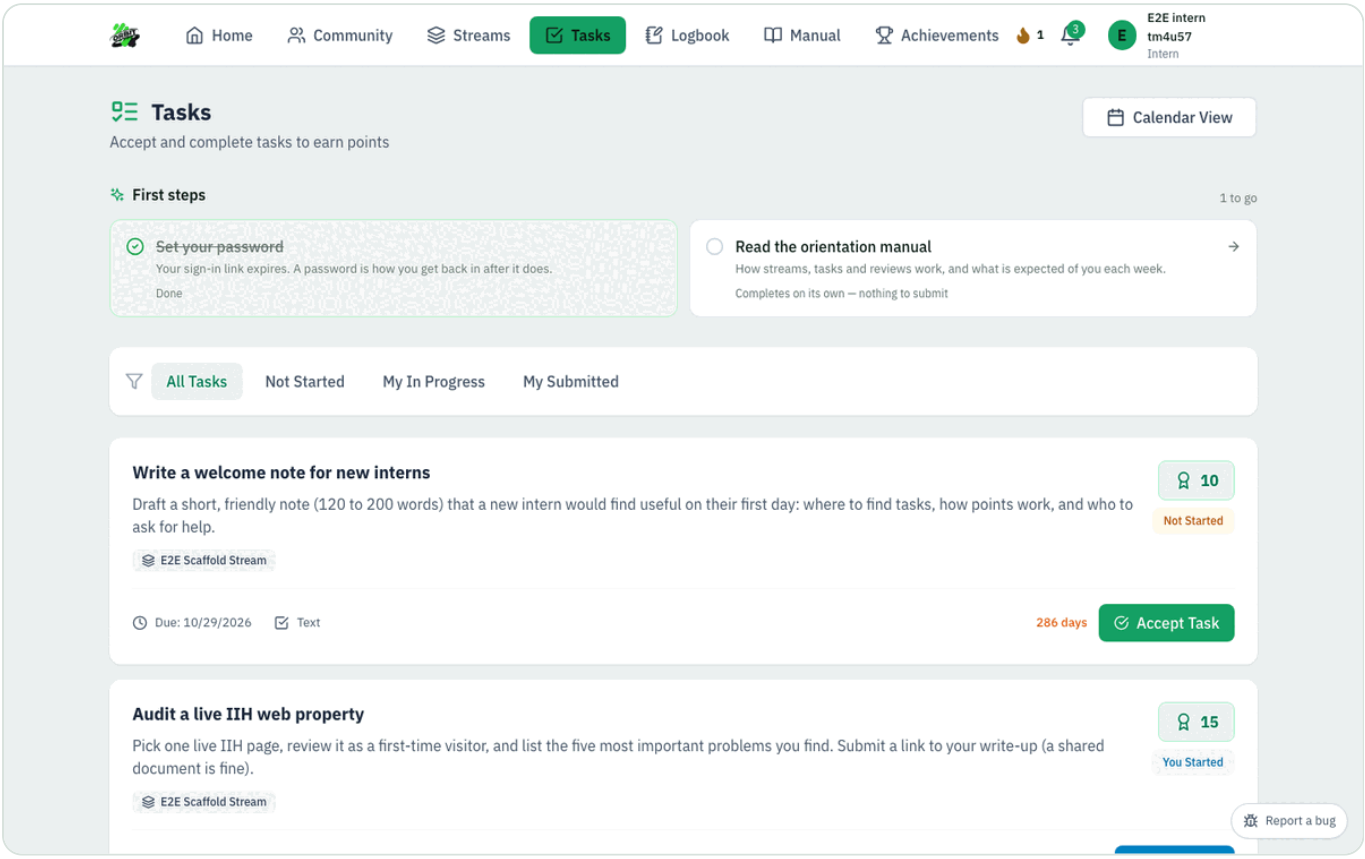

Who runs ORBIT

ORBIT is run by the **ORBIT Agent**, an automated assistant. It writes each week's tasks, marks your work, reviews your logbook and answers your messages. When something says it was done by the ORBIT Agent, that is what it means — there is no person behind it, and it will tell you so if you ask.

SECTION 02

Your weekly tasks

Every week your stream gets new tasks, written by the ORBIT Agent for that stream. You get one message listing them when they are published.

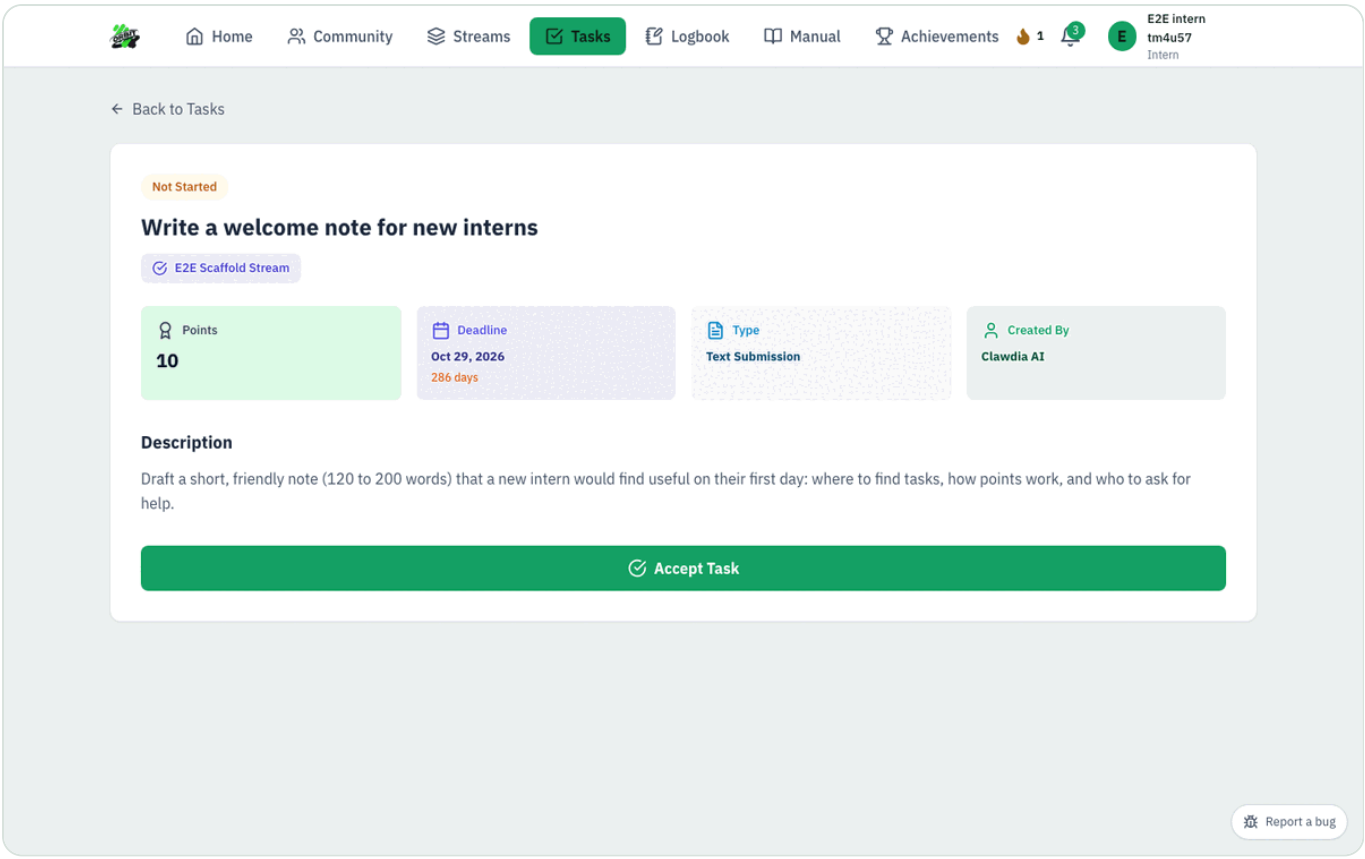

Tasks. Each card shows the stream, the points it is worth and how long is left.

- **Pick the ones you want** and complete **at least two each week**. Points add up, so doing more earns more.
- **Deadlines** fall at the end of the week — Thursday at 23:59 (WAT) for the current cohort. The task page shows each task's exact deadline.
- Each task says **how to hand it in**: a written answer, a link, or a file.

Taking a task on

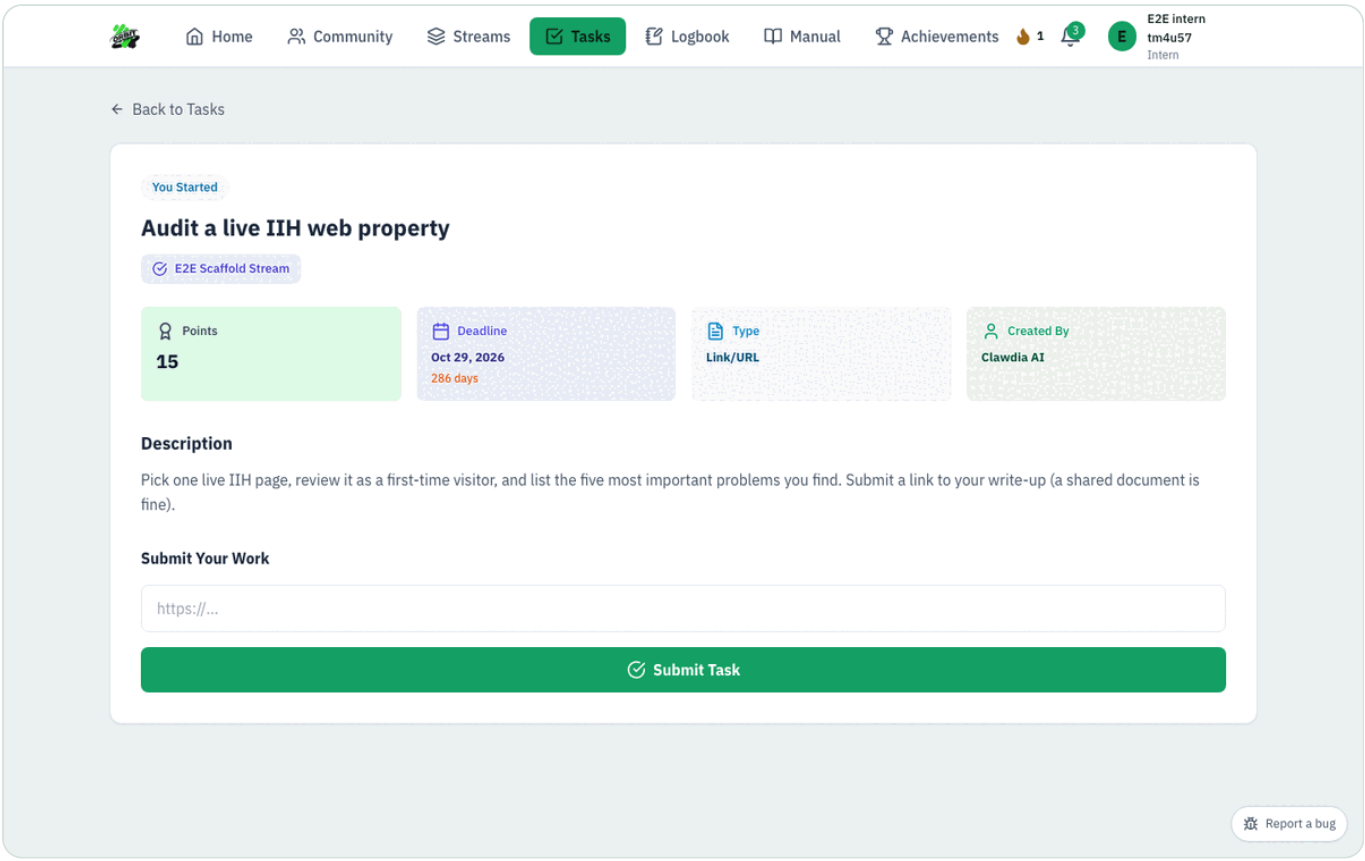

1. Open the task and read the whole brief — it says what to do, what to hand in, and what good looks like.
2. Press **Accept Task**.

A task you have not started yet.

SECTION 03

Handing in your work

The submission form, once you have accepted a task.

1. Open the task you accepted.
2. Write your answer, paste your link, or choose your file — whichever the task asks for.
3. Press **Submit Task**.

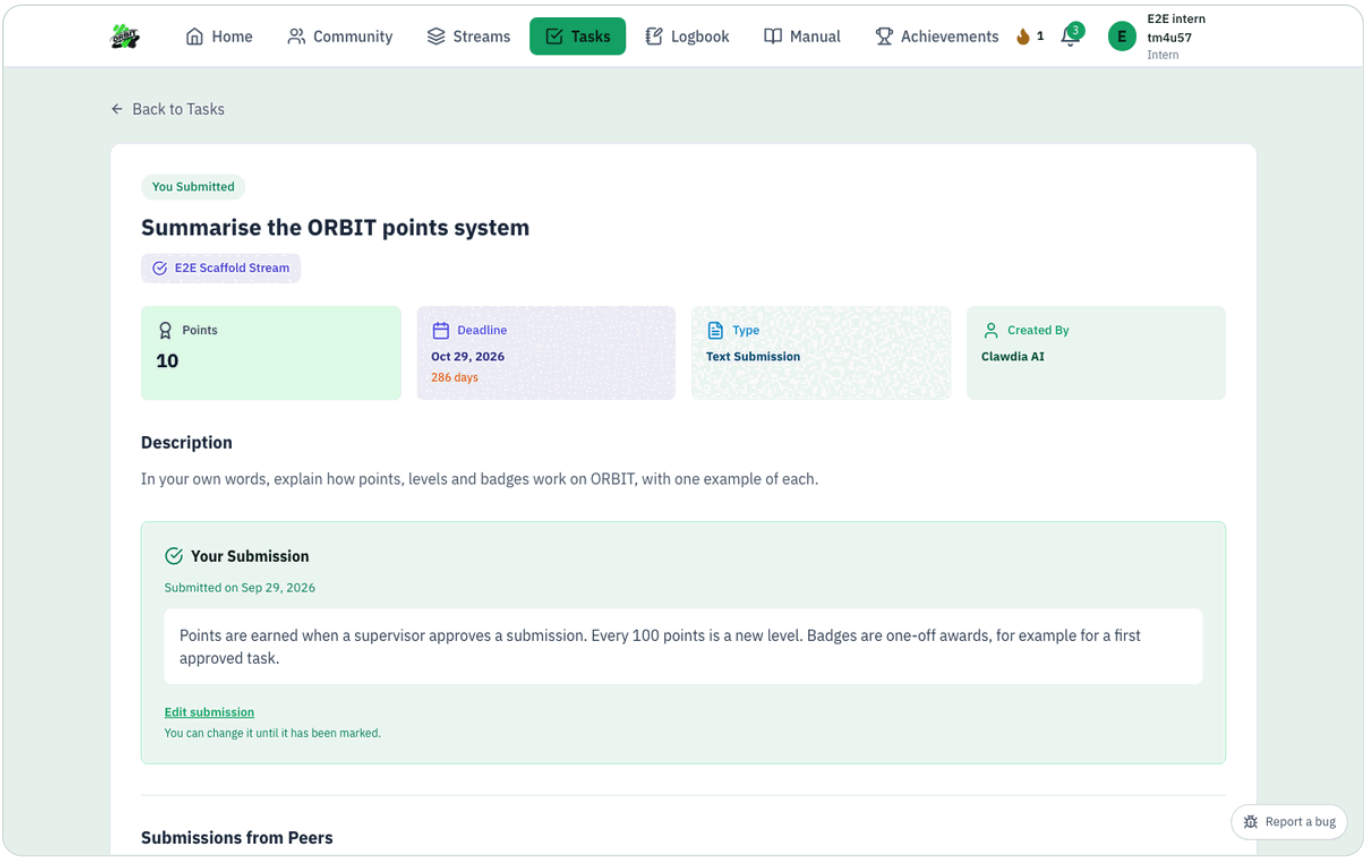

Links must open for anyone

Your work is marked by reading it, so a link has to open **without signing in**. For Google Docs, Sheets, Slides or Drive: **Share → General access → Anyone with the link → Viewer**.

> Folders, private GitHub repositories, Notion, Canva and Figma links usually cannot be read. A PDF, a Word document, or a public link is the safest way to hand work in.

Changing what you handed in

You can change a submission **until it is marked** — even after the deadline. Open the task and press **Edit submission**, make your change, and press **Update Submission**.

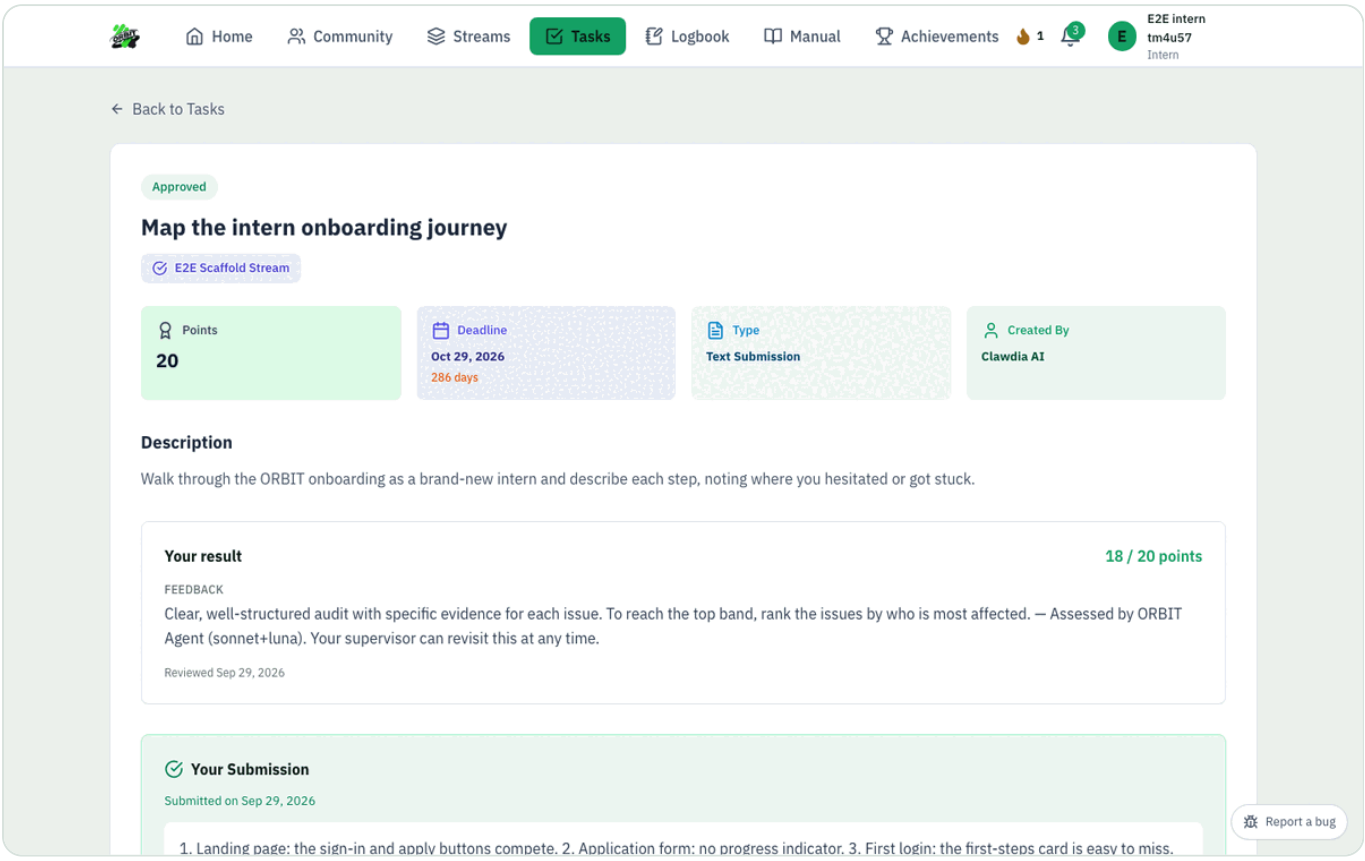

A submission waiting to be marked, with **Edit submission** beneath it.

> Once a task's deadline has passed you cannot *start* it, but anything you already submitted can still be edited, and work that was returned to you can still be resubmitted.

SECTION 04

How your work is marked

Two independent automated markers read each submission against the task's brief and must agree on a score; if they do not, a third reads it. Marking usually happens within a few days, and can take longer just after a Thursday deadline, when everyone submits at once.

A marked submission: your score, and feedback that says what worked and what would raise the mark.

WHAT YOU SEE	WHAT IT MEANS
Approved with a score and feedback	Marked. The points are added to your total.
Changes requested	The markers agreed the work does not answer this task — usually because it was meant for a different one. Read the feedback, then fix it and submit again.
A notification that your work **could not be opened**	Usually a link that asks for a sign-in. Fix the sharing, or edit the submission. Links are tried again once a day, up to four times.
Approved automatically, "not individually assessed"	The markers could not read it or could not agree, so after five days you were given the full points rather than left waiting.

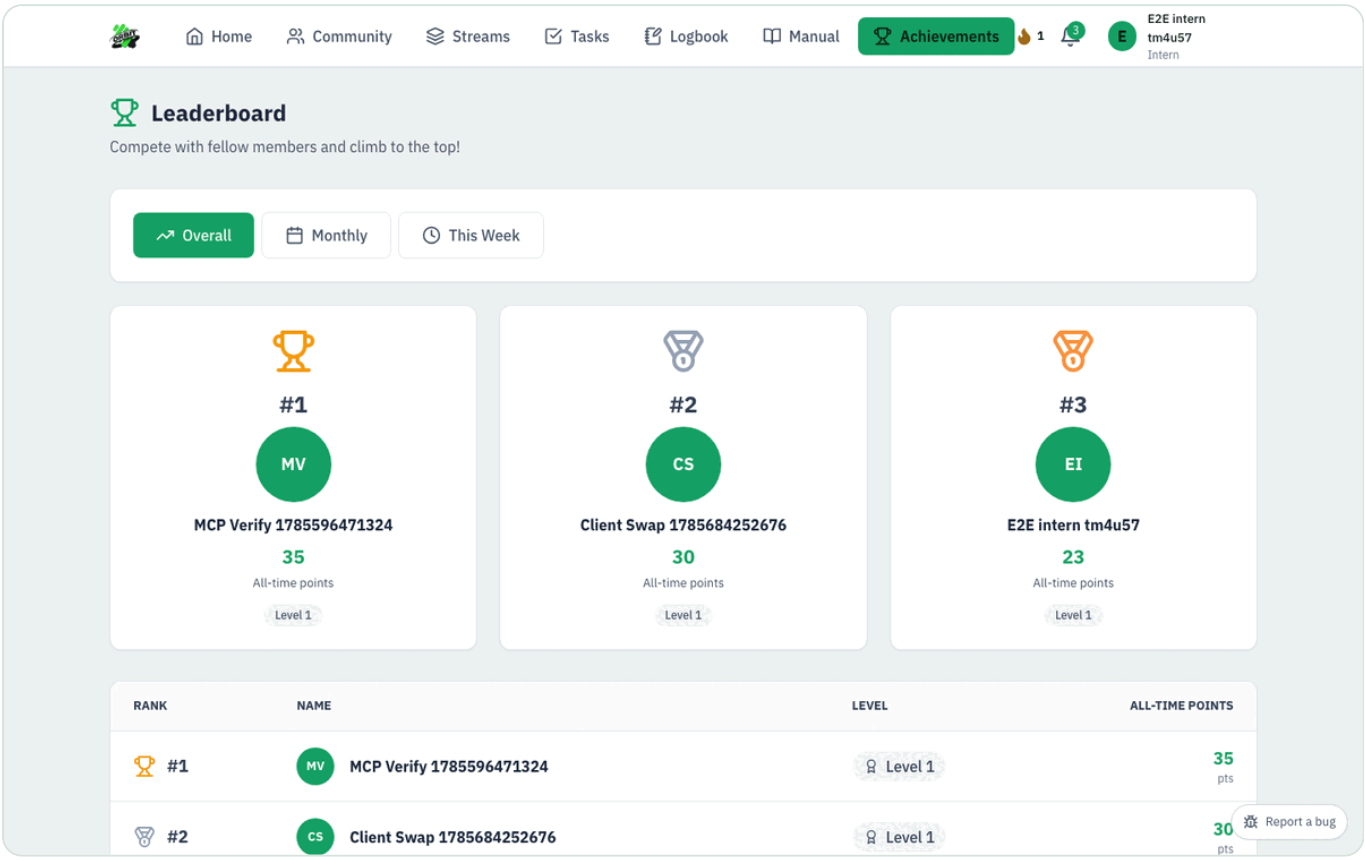

> A submission with no work in it — just “done” or “please check” — is never approved automatically. Resubmit it with the work itself.

Marks are final once given. There is no one to appeal to, so the best way to a better mark is the feedback on this one.

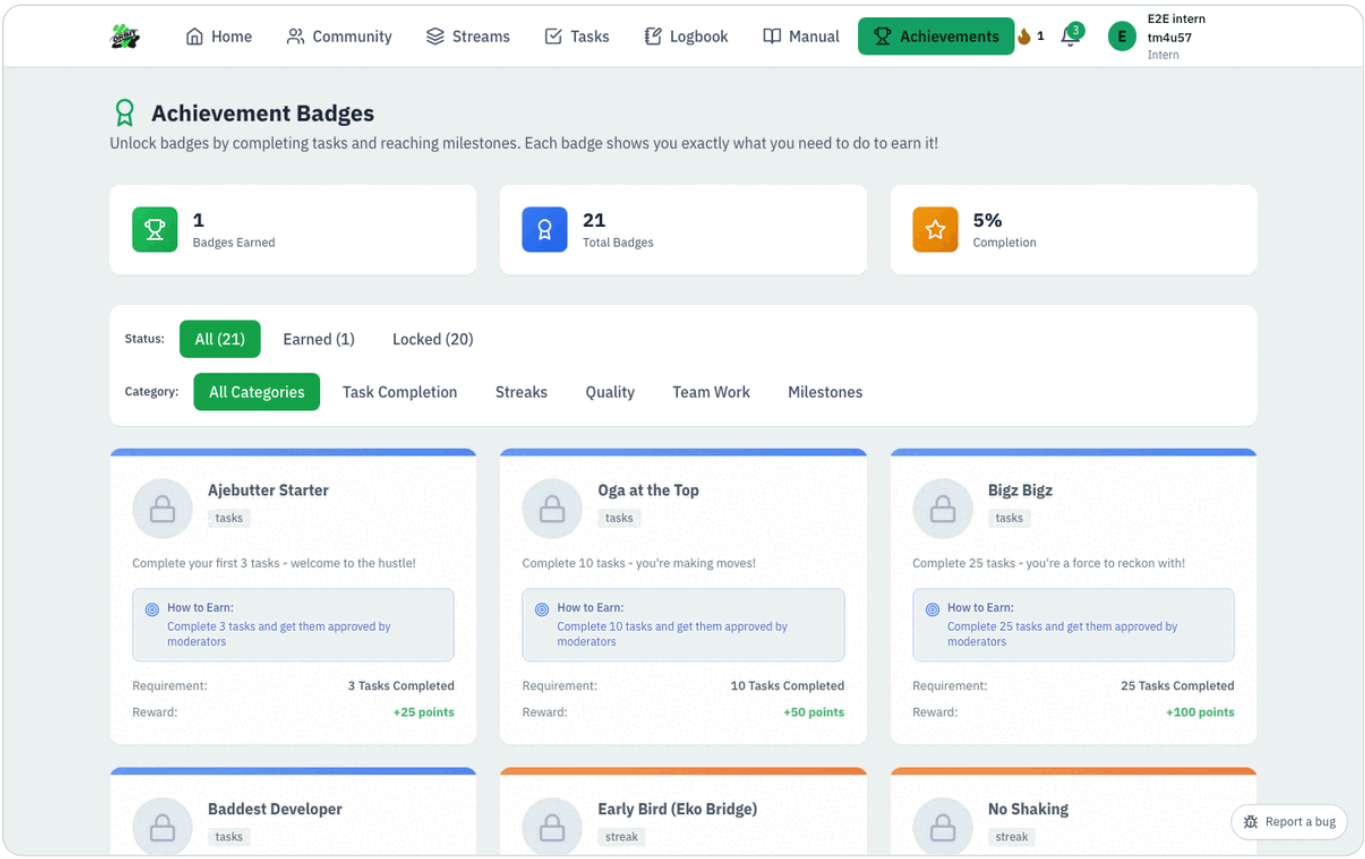

SECTION 05

Points, levels and badges

Every approved submission earns points. Points raise your **level**, and **badges** are awarded automatically for milestones — your first completed task, crossing a points threshold, and more.

The leaderboard, under **Achievements**, ranks interns by points.

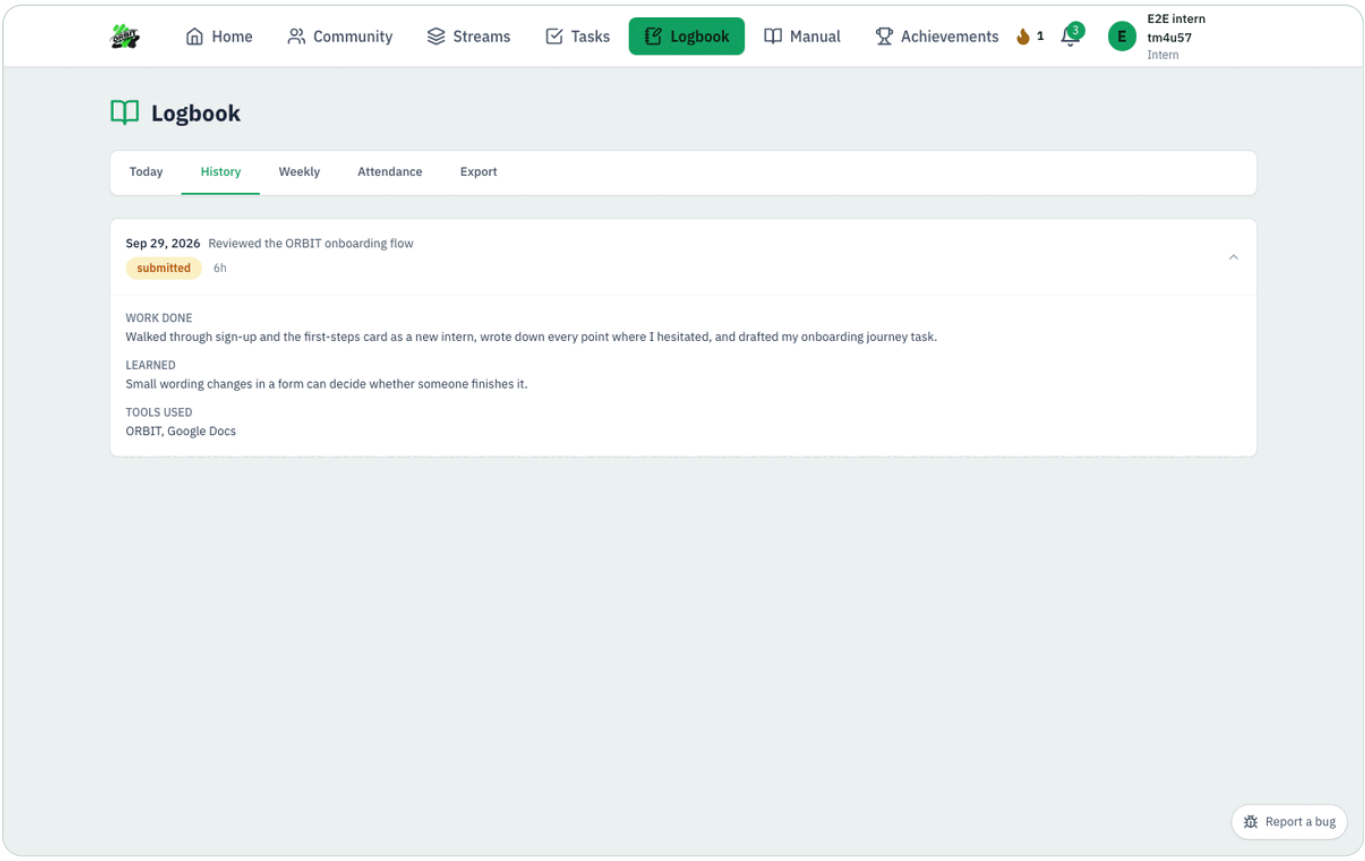

Your badges, and the ones still to earn.

SECTION 06

Your logbook

SIWES students keep a logbook, because your institution will inspect it. If your programme does not keep one you will only see **Attendance** here — checking in when you come to the Hub.

The logbook: daily logs, weekly summaries and attendance.

Daily logs

1. Open **Logbook** and add a log for the day.
2. Describe the work you actually did, what you learned and anything that got in the way. Short and plain is fine — it has to be real.
3. Submit it. The ORBIT Agent reviews it; it is sent back only if it does not describe any real work, and you can edit and resubmit.

Weekly summaries

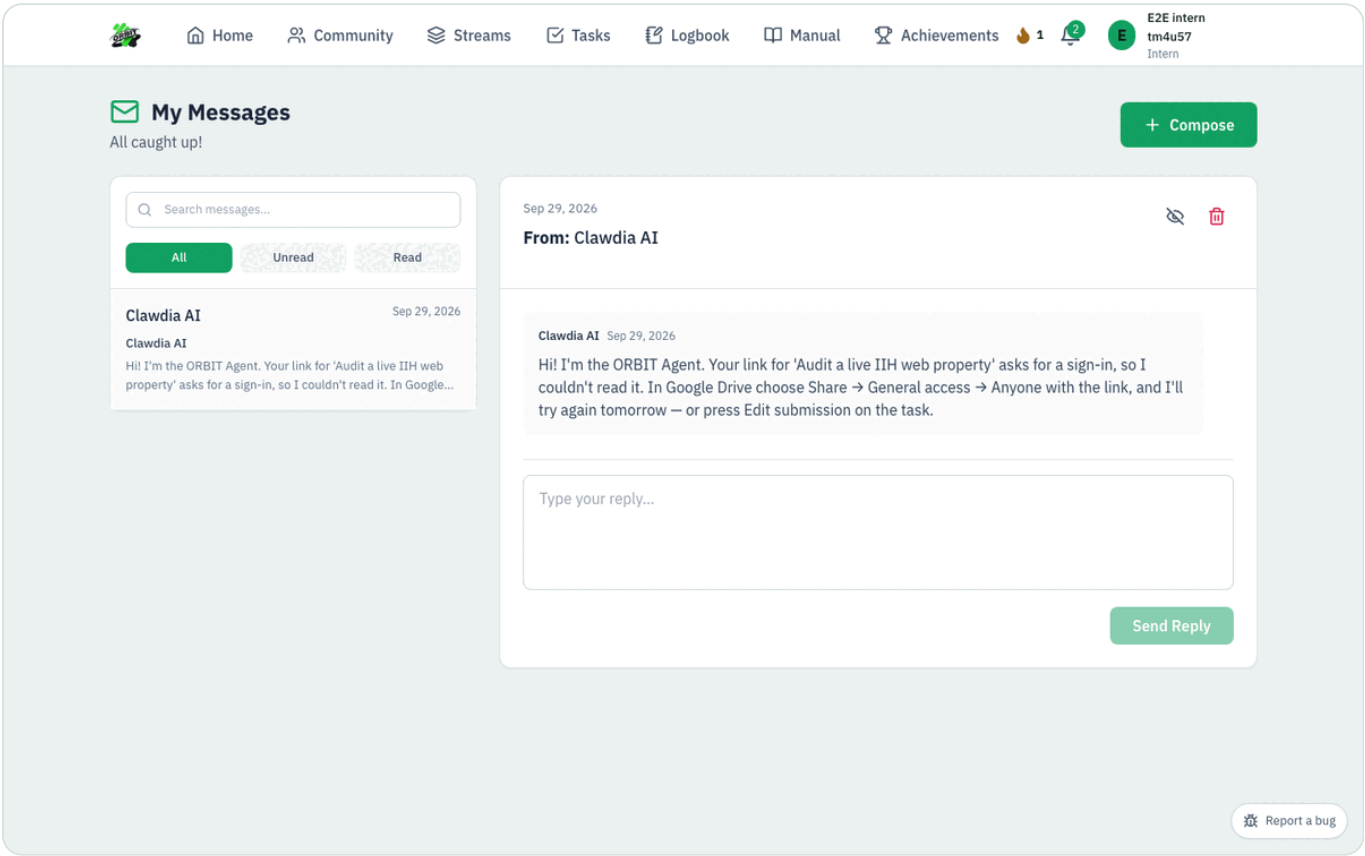

At the end of each week, write a short summary. It is signed off by the ORBIT Agent once the week is over, at least one of that week's daily logs is approved, and none is still waiting or sent back. A nearly empty summary is returned for you to fill in.

> Your SIWES acceptance letter was attached to your acceptance email as a PDF. Keep it — it is what your institution asks for.

SECTION 07

Getting help

Message the **ORBIT Agent** from **My Messages** (open the menu under your picture, top right) with any question about ORBIT — why a submission has not been marked, how to share a link, when tasks are due. It answers from how ORBIT actually works and from your own record, so it can tell you, for example, exactly why a link could not be opened.

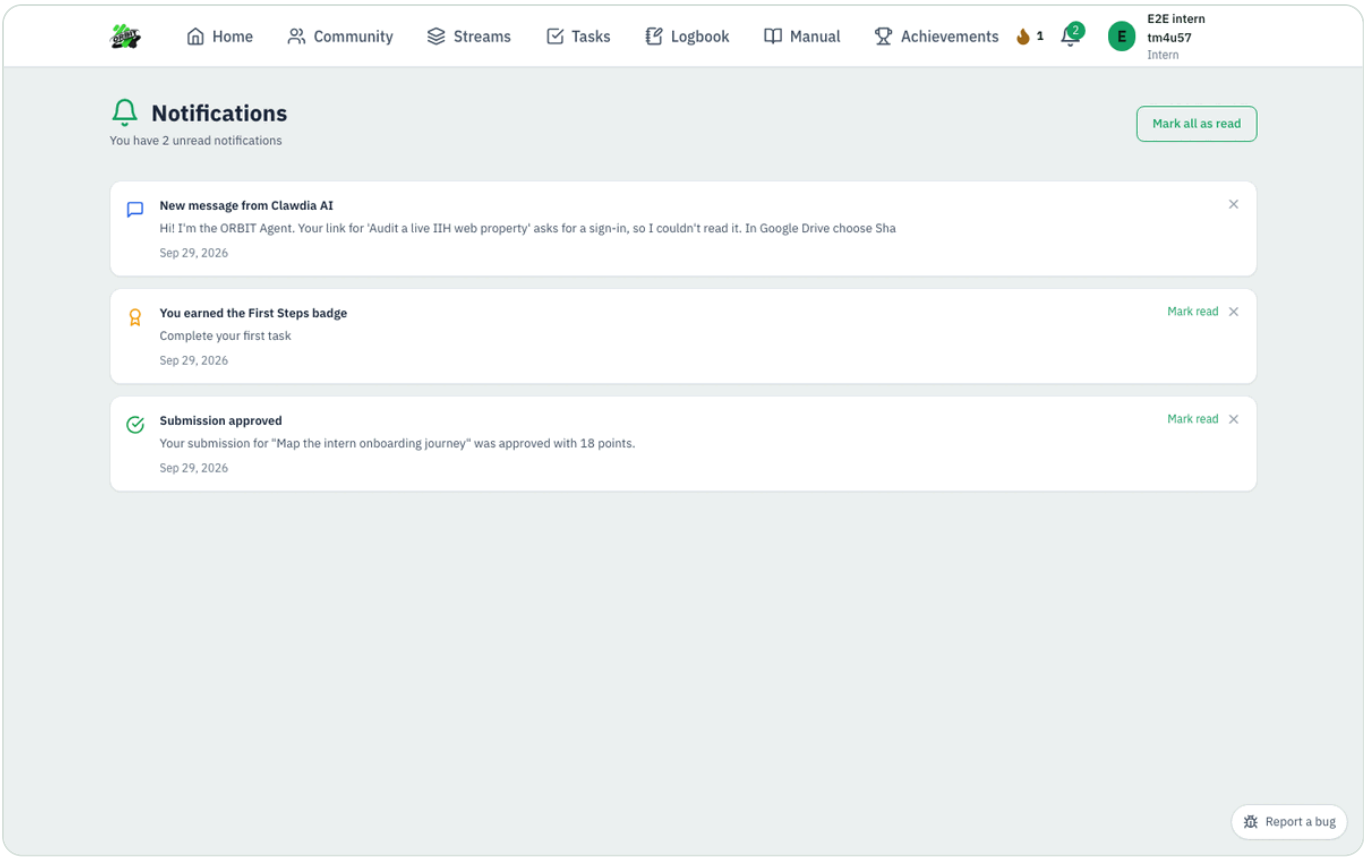

A message from the ORBIT Agent, with the box to reply. (In the test environment its account has a different name.)

> The agent cannot change a mark, extend a deadline, make an exception, or pass your message to a person — those do not exist in ORBIT. It will say so rather than promise something that will not happen.

Notifications

Marks, returned work, new tasks, logbook reviews and replies all arrive as notifications, and most also as an email.

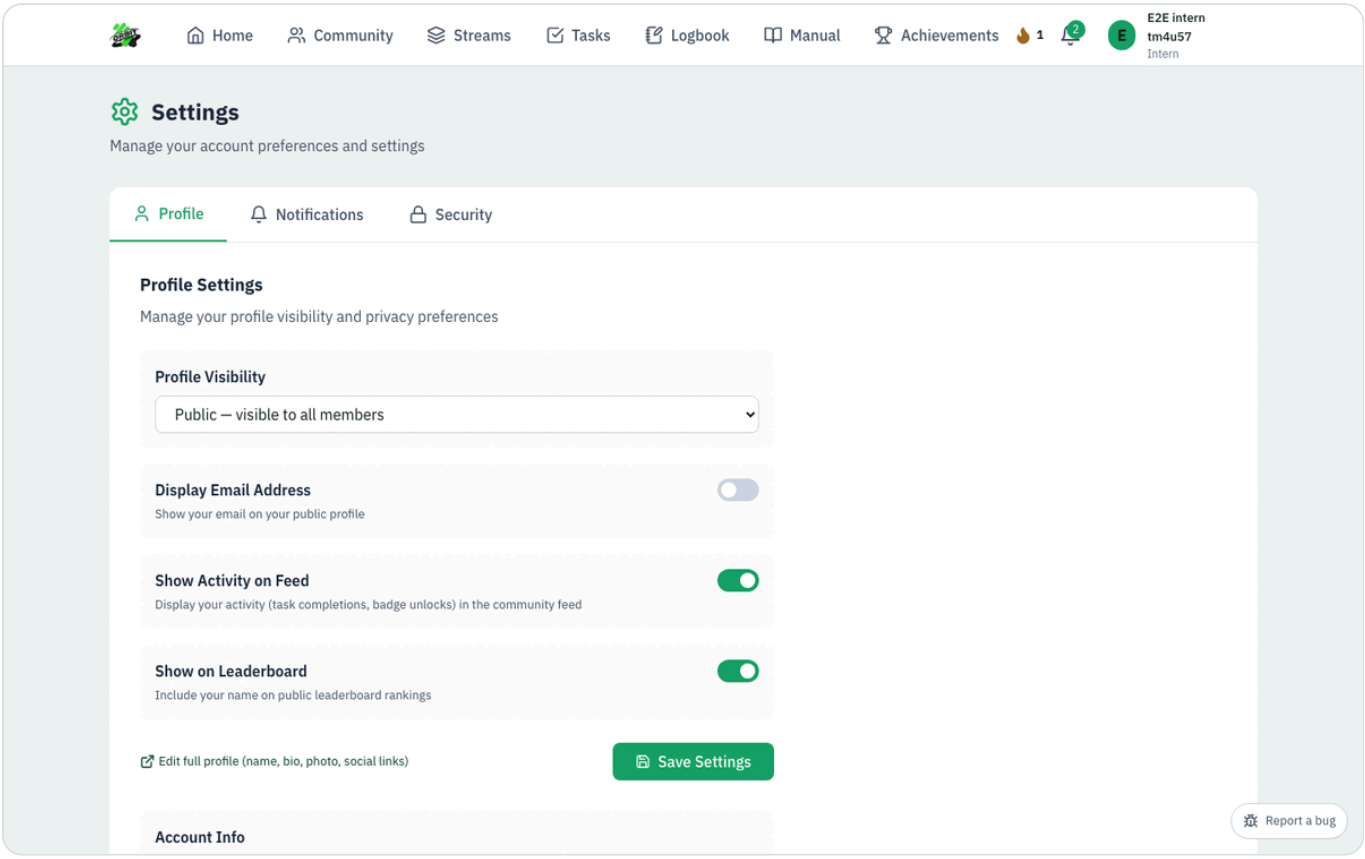

Notifications. Open one to go straight to what it is about.

SECTION 08

Your profile and settings

Settings is where you set or change your password and choose which notifications you receive by email. Your profile — photo, bio, skills — is what other members see.

Settings.

> Screenshots are from the ORBIT test environment, so every name and record in them is fictional. The live platform looks identical.
